Fig. 6: Physicochemical data on D-63 153.

Sequence: Ac-D-Nal(2)-D-Cpa-D-Pal(3)-Ser-N-Me-Tyr-D-Hci-  
Nle-Arg-Pro-D-Ala-NH<sub>2</sub>

Name: D-63153 (e.g. acetate salt)

Structural formula:

Molecular formula: C<sub>72</sub> H<sub>96</sub> Cl N<sub>17</sub> O<sub>14</sub> × C<sub>2</sub> H<sub>4</sub> O<sub>2</sub>

Molecular weight: 1459.1 g/mole (free base)

Spec. optical rotation: -47.0 to -57.0 (0.25% in MeOH)

Solubility: 0.75 mg/ml in water

Appearance: white amorphous powder, odorless
